TECHNICAL SKILLS

- **Languages:** PHP (Core & Advanced), Python, JavaScript, C, C++, SQL, NoSQL
- **Frameworks:** Laravel, Node.js, Flask, Django, jQuery, Bootstrap
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools:** Docker, AWS (ECS, ECR, S3, Lambda, EC2), Git, Postman, VS Code
- **Concepts:** OOP, Microservices, REST APIs, WebSockets, MVC, Agile

PROFESSIONAL EXPERIENCE

NovasArc

Software Engineer

Hyderabad, India | September 2023 – Present

- Spearheading backend API development using Laravel for 15+ enterprise clients, achieving 40% performance improvement and 99.8% uptime
- Overseeing containerized deployments with Docker and AWS ECS, reducing deployment time by 60% and enhancing CI/CD pipeline efficiency for 25+ projects
- Partnering with cross-functional teams of 8+ developers to deliver 12 secure, production-ready applications, consistently meeting business requirements within deadline

NovasArc

Software Developer Intern

Hyderabad, India | March 2023 – September 2023

- Engineered a website monitoring system for 500+ sites utilizing PHP Core APIs with 99.9% uptime tracking
- Integration of Google APIs into Laravel applications for seamless workflows
- Participated in code reviews, technical documentation, and agile sprint planning processes
- Coordinated with senior developers on API design and database optimization strategies

KEY PROJECTS

Emerge – Content Management Platform

Laravel, Microservices, WebSockets, MySQL, REST APIs, AWS

- Designed scalable REST APIs for content, school, and company management, supporting 10,000+ active users
- Incorporated Google Calendar and Outlook Calendar integrations, processing 500+ events monthly
- Enhanced system scalability through microservices architecture and containerized deployment strategies

UpBot – Website Monitoring Tool

Core PHP, AWS ECS, ECR, Docker, API Gateway

- Created a real-time website monitoring platform supporting 1,000+ concurrent users with low latency responses
- Launched via AWS ECS and ECR with load balancing and Docker for real-time updates

Jitsi KYC – Video Verification Platform

Javascript, Jitsi Meet API, AWS S3

- Constructed a secure video KYC system using Jitsi Meet integration for identity verification
- Established document upload, recording, and real-time verification workflows
- Assembled a secure file storage system using AWS S3 with encryption and access control policies

EDUCATION

Master of Computer Applications (MCA)

IFTM University, Moradabad

2023 – Present

Bachelor of Computer Applications (BCA)

IFTM University, Moradabad

2020 – 2023 | CGPA: 9.1
